PROFESSIONAL SUMMARY

Dedicated and versatile Software Engineer with professional experience spanning rigorous software testing, backend support, and full-stack web development. Skilled across modern frontend frameworks (Vue, React, Next.js), database architecture, and automated testing. Passionate about building impactful products, writing clean code, and delivering polished, user-centric experiences.

TECHNICAL SKILLS

- **Languages & Core:** JavaScript, TypeScript, Python, C, C#, HTML5, CSS3, SQL
- **Frontend & Frameworks:** Vue.js, Vuetify, React, Next.js, Nuxt, Tailwind CSS, Bootstrap, SASS
- **Backend & APIs:** Node.js, Express.js, Django, Flask, ASP.NET, GraphQL, Apollo Server
- **Databases:** PostgreSQL, MySQL, SQLite, MongoDB
- **Cloud, DevOps & Testing:** Azure, Docker, Kubernetes, Vercel, Git, Jest, Playwright, Puppeteer

PROFESSIONAL EXPERIENCE

Software Engineer

Insurance Company | September 2025 – Present

- Collaborate closely with a senior developer to design, test, and maintain enterprise software solutions and backend services.
- Conduct rigorous software testing and quality assurance to ensure high performance, security, and reliability across systems.
- Build and optimize internal tools and user-facing applications to streamline operational workflows.

FEATURED PROJECTS

Afrosurance | JS, Vue, Vite, Vuetify, Node.js

- Designed and built a full-stack fintech web application entirely from scratch tailored for the African informal economy.
- Spearheaded product direction by introducing a targeted phone insurance option based on the specific needs of the audience being advertised to.
- Engineered a responsive user interface utilizing Vue and Vuetify with custom branding, robust routing, and seamless deployment on Vercel.

Heart of Mopani | *Next.js, React, Tailwind CSS, PostgreSQL*

- Developed a comprehensive regional tourism and travel web platform highlighting local culture, nature, and practical logistics.
- Implemented dynamic destination cards, interactive maps, and affiliate e-commerce integrations ("Pack For The Wild" gear guide).
- Managed backend data flow and relational database architecture using PostgreSQL and Tailwind CSS for rapid, responsive UI styling.

EDUCATION & CERTIFICATIONS

- **Introduction to Computer Science (CS50x)** | HarvardX
Completed rigorous computer science curriculum covering algorithmic thinking, low-level memory management, data structures, and web development.
- **CS50 SQL Database Course** | HarvardX
Designed and built complex relational database architectures, culminating in the *Minecraft World Logistics Database* project.
- **CS50 Cybersecurity** | HarvardX
Studied core security principles, vulnerability assessment, and threat mitigation strategies.
- **Fundamentals of AI** | Cognitive Class
Gained foundational knowledge of artificial intelligence concepts, core algorithms, and real-world machine learning applications.
